

Fall Arrest System

Our unique system designed to safely climb silo ladders with ease!

- Hands free ascent / descent in all planes whether it be horizontal or vertical.
- Once hooked onto tensioned wire rope you are completely secure at all stages of the climb
- The system will bring you to a complete stop within the 600mm regulation no matter what height you are at.
- Easy access right to the top of your silo or vessel
- Materials fabricated from 304 Stainless Steel
- Compliance tested to 6.3.1.1 (fixed anchor devices) and Static tested procedures of AS/NZ5532:2013 (manufacturing requirements single point anchor device for harness based work at height)
