

COMPANY PROFILE

Stainless Steel Fabrication:

- We fabricate stainless from .5mm to 50mm and over in thickness.
- We use all types of welding process's (MIG, TIG and Arc)
Fabrication consists of but not limited to:
- Kitchen benchtops, commercial kitchens, hospital fit outs, Gangways for super yachts, drip trays, Pressure vessels, Handrails – both domestic and offshore, deck plates, smoke stop sliding doors, Tanks, milk tankers, 400 litre IBC's – certified to carry methanol, angle and tube brackets, Pipe welding both dairy finish and ASME standard, conveyors, boxes, cabinets and more.

Recent projects include:

- Ballance Agri nutrients – two staff on site full time, repairs and maintenance on all aspects of the plant including conveyors, pumps, compressors, bagging plant and process plant maintenance.
- Just Water - Complete bottling and bottle washing plant build in Penrose site, fabrication of tanks, conveyors and pipework
- Symons Transport – 4 x 14000lt clip on milk tankers, 4 x 17000lt clip on milk tankers.
- Lonza NZ Ltd – all site maintenance including conveyors, hoppers, ducting and pipework etc.
- Pernod Ricard – install of stainless steel pipe work and juice lines for 18 new silos.
- Todd Energy – 10000psi portable degasser.
- Drylands Winery- repair and earthquake strengthening of 40 silos.
- Fonterra-NDA-Tetra Pak – Waitoa UHT upgrade work – new cream lines to Carton machines.
- Egmont Honey – Installation of imported equipment with new pipework and improvements made to imported equipment to meet NZ standards.

Aluminium fabrication:

- Panels, tool boxes, storage boxes, wall brackets, tanks, trailer panelling and decks
- Mooring doors for super yachts and boats, walkways, drain covers, handrails and barriers.

Mild steel fabrication:

- Steel portal frames, beams, posts and lintels for the building industry.
- Deck cover plates, stairways, schedule pipe work to ASME code, sling racks, containerized workshops.
- Ducting and panelling, grating supports, safety showers, and more.
- We fabricate all replacement handrails for STOS Maui Platforms using Shed 80 pipe and have them painted. All handrails come with a QA package for both the fabrication and painting.

Workshop tooling:

- CNC brake press 220ton 4.1metres long
- CNC guillotine 4 metre cut length
- Swage machine
- Heavy duty pipe notching machine
- Tube rollers
- Plate rolls
- Welding machines for all welding process's
- Extensive range of polishing equipment

We are your one-stop-shop of problem-solving engineers and we won't shy away from unusual requests, if you need a solution we will endeavour to find you the most efficient answer.

COMPANY PROFILE

Fall Arrest Systems:

Our unique hands-free (patent pending) Fall Arrest System was designed and tested in 2016 by Superior Stainless and is now fitted to a number of different access ladders on silos, vessels and platforms.

Features:

- Hands free ascent / descent in all planes whether it be horizontal or vertical.
- Once hooked onto tensioned wire rope you are completely secure at all stages of the climb
- The system will bring you to a complete stop within the 600mm regulation no matter what height you are at.
- Easy access right to the top of your silo, vessel or platform
- Materials fabricated from 304 Stainless Steel
- Our System was certified by QSi Safety in their IANZ accredited laboratory on the 15th June 2016 as compliant with: 6.3.1.1 (fixed anchor devices) and Static tested procedures of AS/NZ5532:2013 (manufacturing requirements single point anchor device for harness-based work at height)
